

Guidelines related to the project module

Objectives: The goal of this module is to have the students do an industry-relevant project in a topic related to modern communication systems. A module may have one or more instructors, who will decide the topics of the projects in consultation with the enrolled instructors. A specific project may be split across at most two modules.

1. A student is free to do the project module with any communication faculty or the faculty who has taught an eMasters course. Here is the list:
 - a. Adrish Banerjee
 - b. Aditya Jagannatham
 - c. AK Chaturvedi
 - d. Vipul Arora
 - e. Abhishek Gupta
 - f. Tushar Sandhan
 - g. AR Harish
 - h. Swamy P
 - i. Ketan Rajawat
 - j. Rohit Budhiraja
2. This is only a tentative list of the faculty. Please mail them before registering to confirm whether they are offering the project module in the current quarter.
3. The project should be in the broad area of advanced communication systems. Exact topic will be decided by the faculty in discussion with the student.
4. A student will be evaluated by a committee based on the performance in the entire quarter. Usual grading scheme will apply.
